

CLIPFORGE AGENCY
Autonomous Content Acquisition & Monetization Engine
Complete Business Blueprint — July 2026

1. EXECUTIVE SUMMARY

ClipForge is not a clip editing agency. It is a **distributed AI perception network** that finds content creators, produces viral short-form content from their existing material, and closes them as paying clients — with minimal human intervention.

Core thesis: The gap between "streamer goes live" and "viral clip hits TikTok" is 6-24 hours. Whoever closes that gap owns the revenue.

The market:

- TikTok Creator Rewards: **\$0.40-\$1.00 per 1K qualified views**
- A single 10M view clip = **\$4,000-\$10,000 gross**
- Top 10K creators average **\$8,400/month** from Creator Rewards alone
- 16M+ creators use AI clipping tools (Opus Clip, Munch) but **0.01%** have an actual agency

The moat: 48-phone device farm + Hermes Android programmatic control + DeepSeek V4 vision reasoning. Nobody else has physical devices seeing the real internet.

2. THE OFFER

Service Tiers

Tier	Price	Deliverables	Target Client
Starter	\$500/mo	14 clips/week, 2 platforms (TikTok + YT Shorts), auto-captions	1K-10K follower streamers
Growth	\$1,000/mo	28 clips/week, 4 platforms, thumbnails, A/B testing	10K-100K followers
Viral	\$2,000/mo	50 clips/week, all platforms, meme inserts, analytics reports	100K-1M followers
Enterprise	\$5,000+/mo	Unlimited clips, dedicated editor, brand deal sourcing, 24h turnaround	1M+ followers

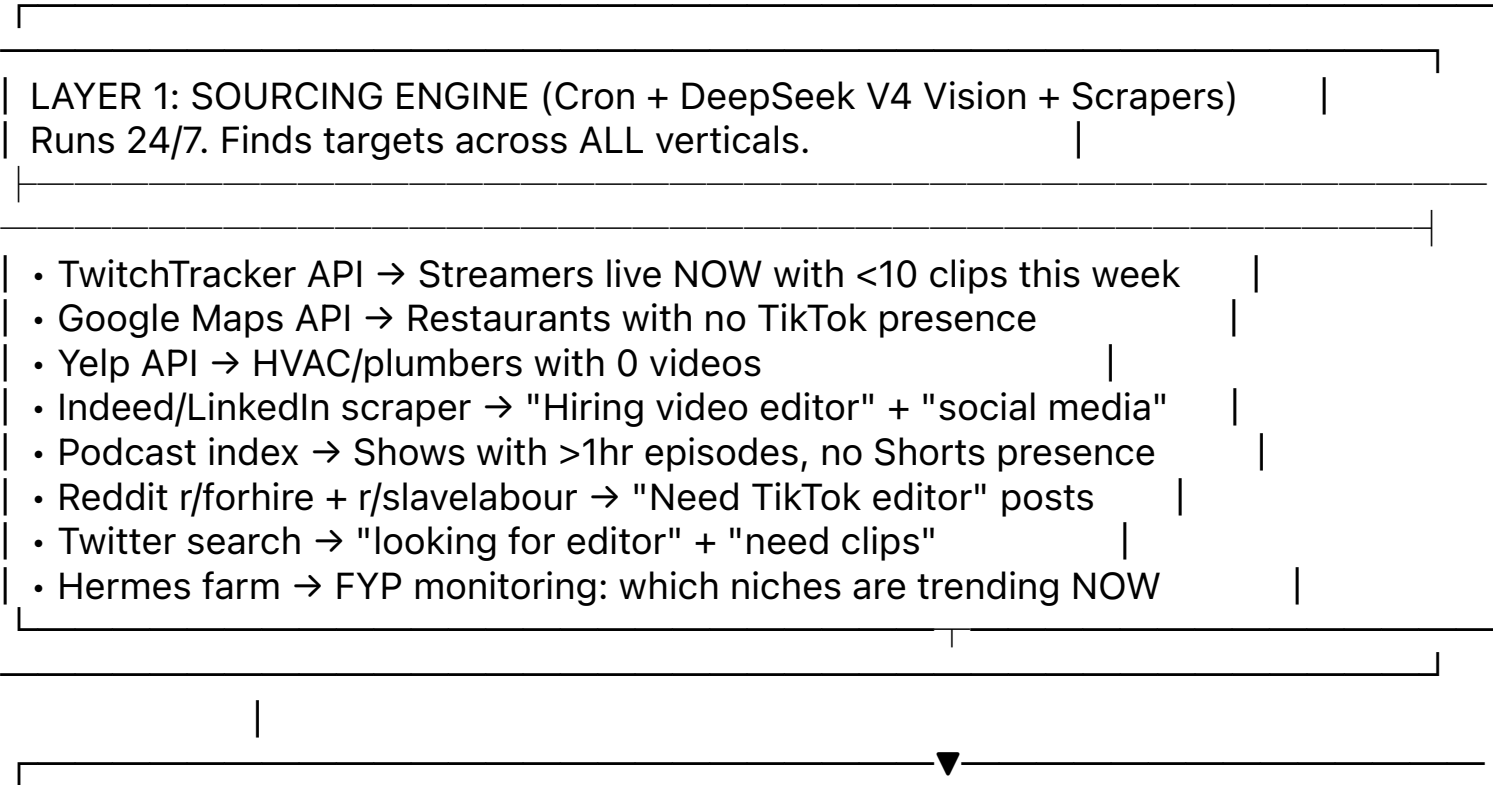

Revenue Models

- **A. Revenue Share (Default for New Streamers)**
 - Agency takes 30-50% of clip-generated revenue (TikTok Creator Rewards, YT AdSense, brand deals)
 - Tiered: Starter 50% → Growth 40% → Viral 30% → Elite 25%
 - Viral bonuses: \$100 at 1M views, \$500 at 10M, \$2,500 at 50M
- **B. Flat Fee (Established Streamers)**
 - Predictable revenue, no upside sharing
 - Basic \$500/mo → Pro \$1,500/mo → Agency \$3,000/mo
- **C. White Label (Other Agencies)**
 - Sell the AI pipeline as SaaS
 - \$2,000-5,000/mo per agency license

3. THE AUTONOMOUS PIPELINE

Architecture Overview

...

| LAYER 2: PRODUCTION ENGINE (Runway + Seedance + FFmpeg + DeepSeek V4) |
| Makes content from whatever source material exists. |

| Gaming: yt-dlp VOD → DeepSeek scores moments → FFmpeg captions → render |
| Restaurant: Google Photos + Seedance food animation + Runway ambiance |
| HVAC: Website images + stock footage + Seedance "before/after" |
| Podcast: RSS feed → Whisper transcribe → viral moment detection → clip |
| Generic: Any URL → screenshot → analyze → generate hook → produce |

| LAYER 3: OUTREACH ENGINE (Hermes Android + Burner Accounts) |
| Delivers the product and closes the deal. NO EMAIL. NO API. |
| Native app DMs = human behavior = no ban. |

| • Hermes opens TikTok/Instagram → finds target profile → taps DM |
| • DeepSeek drafts personalized message with video attached |
| • "I made this from your stream. 3 more like it. \$500/mo. Yes or no?" |
| • If yes → Stripe payment link sent via DM. Auto-onboarding. |
| • If no → logs objection → analytics optimizer learns → retries in 7d |

| LAYER 4: FULFILLMENT ENGINE (Hermes Farm + Cron + Auto-post) |
| Once paid, content goes live. Money flows back. |

| • Client VODs auto-downloaded daily via cron |
| • Clips auto-produced → queued for client approval (24h auto-approve) |
| • Hermes posts to client's accounts OR our farm accounts (rev share) |
| • TikTok Creator Rewards / YT AdSense → Stripe Connect → auto-split |
| • Analytics scraped daily → DeepSeek optimizes next batch |

...

4. THE TECH STACK

4.1 AI Model Tiers

Tier	Model	Use Case	Cost
Local	Ollama Qwen3-8B / DeepSeek-R1-8B	Pre-screening, basic tagging, rights check	\$0
Cheap API	DeepSeek V4-Flash	High-volume: captions, hooks, meme detection	\$0.14/\$0.28 per MTok
Mid API	DeepSeek V4-Pro	Validation, trend analysis, drop coordination	\$0.435/\$0.87 per MTok
Premium	Claude Opus 4.8	Card design, social copy, creative work	\$5/\$25 per MTok
Ultra	Claude Fable 5	Mythic-tier creative only	\$10/\$50 per MTok

Total monthly AI cost: ~\$220 for full agency pipeline.

4.2 Core Infrastructure

Component	Technology	Purpose
Agent Orchestrator	Paperclip AI	10-agent pipeline with budget enforcement
Video Pipeline	FFmpeg + Python	Transcribe, caption, edit, render
Transcription	Deepgram Nova-3 / Whisper	\$0.0043/min word-level captions
Database	PostgreSQL 15	Clips, streamers, posts, analytics, payouts
Cache/Queue	Redis 7	Job queues, sessions, rate limiting
Reverse Proxy	Nginx + SSL	API gateway, rate limiting, security headers
Device Control	Hermes Android	38 tools, WebSocket relay, accessibility tree
Farm Hardware	48x Samsung A20 rack	Multi-account posting, FYP monitoring
Proxy Rotation	Residential proxy pool	Per-device IP rotation

4.3 Hermes Android Integration

- Why Hermes over Appium/Selenium:
- No root required — AccessibilityService only
 - 38 granular tools — tap, swipe, type, screenshot, read screen, notifications, clipboard
 - Structured screen understanding — accessibility tree (not just pixels)

- **WebSocket outbound** — works behind any NAT, no port forwarding

- **6-character pairing** — simple auth, rate-limited

- **Android Automotive OS support** — future-proof

Connection topology:

```

\ \ \
Phone (192.168.1.101) —WebSocket—> Hermes Relay (your-vps.com:8766)
VPS (Paperclip/Clip Engine) —HTTP—> Hermes Relay —WebSocket—> 48
Phones
\ \ \

---
```

5. THE DEVICE FARM

5.1 Hardware Spec

Component	Spec	Cost
----- ----- -----		
Rack	4-tier steel shelving with cooling + power distribution	\$300-500
Phones	48× Samsung A20 (used, bulk AliExpress)	~\$40 × 48 = \$1,920
USB Hubs	4× 16-port powered USB 3.0 hubs	\$80 × 4 = \$320
Power	4× 10-port USB charging stations	\$50 × 4 = \$200
Rack PC	Intel NUC i5 + 16GB RAM (local relay + Ollama)	\$400
Network	Gigabit switch + WiFi 6 router	\$150
Proxies	Residential proxy pool (Bright Data / IPRoyal)	~\$50/mo
TOTAL	~\$3,000 one-time + \$50/mo	

5.2 Phone Allocation

Tier	Phones	Accounts	Purpose
----- ----- -----			
Tier 1	12	TikTok US	Gaming clips, prime time posting
Tier 2	12	TikTok UK/EU	Regional content, EU market testing
Tier 3	12	Instagram + Twitter	Visual content, brand awareness
Tier 4	12	YouTube Shorts + Backup	Long-tail content, account rotation

5.3 Daily Schedule (UTC)

Time Slot	Phones Active	Task
----- ----- -----		
00:00-06:00	48	FYP monitoring + trend scraping (EU/Asia active)

06:00-12:00	24 gaming + 24 local biz	Post gaming to US TikTok; post restaurants to EU IG
12:00-18:00	32 gaming + 16 HVAC	Post gaming to EU/UK; post HVAC to US
18:00-00:00	40 gaming + 8 podcast	Post gaming to US prime time; podcast clips all regions

6. MULTI-VERTICAL EXPANSION

6.1 Vertical 1: Gaming Clips (Month 1-2)

- **Target:** Twitch/Kick streamers, 1K-100K followers
- **Source:** TwitchTracker, SullyGnome, live stream APIs
- **Production:** VOD download → DeepSeek moment detection → FFmpeg captions → render
- **Close:** Hermes DM on TikTok/Instagram with sample clip
- **Revenue:** Rev share 30-50% or flat fee \$500-2,000/mo

6.2 Vertical 2: Local Business (Month 2-3)

- **Target:** Restaurants, HVAC, plumbers, salons with 0 TikTok presence
- **Source:** Google Maps API, Yelp API, local business directories
- **Production:** Existing photos + Seedance animation + Runway B-roll + trending audio
- **Close:** Hermes DM on Instagram with "I made this for your restaurant"
- **Revenue:** Flat fee \$500-1,500/mo per business

6.3 Vertical 3: Podcast Clips (Month 3-4)

- **Target:** Podcasts with >1hr episodes, no Shorts presence
- **Source:** Podcast Index API, RSS feeds, Spotify
- **Production:** RSS → Whisper transcribe → DeepSeek quotable moment detection → waveform + captions
- **Close:** Twitter DM with clip + "Your episode had 5 viral moments you missed"
- **Revenue:** Rev share or flat fee \$300-1,000/mo

6.4 Vertical 4: Job Posting Arbitrage (Month 2+)

- **Target:** Companies posting "hiring video editor" on Indeed/LinkedIn
- **Source:** Indeed API, LinkedIn scraper, r/forhire
- **Production:** Auto-apply with portfolio (generated from your work)
- **Close:** Email/DM with "I already made a sample for your brand"
- **Revenue:** \$1,000-3,000 per project

6.5 Vertical 5: Trend Intelligence SaaS (Month 4+)

- **Target:** Brands, agencies, hedge funds
- **Source:** Hermes farm FYP data aggregated across 48 phones × 50 scrolls/day
- **Product:** Weekly trend reports: "These 10 sounds will blow up next week"
- **Revenue:** \$2,000-10,000/mo per enterprise client

7. REVENUE MODELS & UNIT ECONOMICS

7.1 Gaming Clip Economics

Metric	Value
TikTok Creator Rewards	\$0.40-\$1.00 per 1K qualified views
YouTube Shorts RPM	\$1.00-\$3.00 per 1K views
Instagram Reels RPM	\$0.50-\$2.00 per 1K views
Combined per 1M views	\$2,400-\$8,500 gross
Agency cut (40%)	\$960-\$3,400 per viral clip

- Scenario:** 10 clients, 2 viral clips (1M+ views) per month
- Gross clip revenue: \$4,800-\$17,000
 - Agency share: \$1,920-\$6,800
 - Flat fee retainers (10 × \$500): \$5,000
 - **Total: \$6,920-\$11,800/month**

7.2 Local Business Economics

Metric	Value
Clients	20 restaurants/HVAC
Price	\$500/mo each
Production cost	~\$20/client (AI + time)
Monthly revenue	\$10,000
Monthly profit	~\$9,600

7.3 Combined Target (Month 3)

Revenue Stream	Monthly
Gaming rev share	\$3,000
Gaming flat fees	\$5,000
Local business	\$10,000

Podcast clips	\$2,000
Trend intelligence	\$5,000
****TOTAL****	****\$25,000/month****

8. HUMAN-IN-THE-LOOP (HITL)

Three escalation gates. Two humans handle everything else.

Gate 1: Before Render

- ****Trigger:**** Clip selected for production
- ****Action:**** Streamer approves raw clip selection
- ****Timeout:**** 30 minutes → auto-approve
- ****Who:**** Client via dashboard or SMS

Gate 2: Before Posting

- ****Trigger:**** New streamer's first 10 clips
- ****Action:**** Editor approves final render
- ****Timeout:**** 30 minutes → auto-approve
- ****Who:**** Internal editor (Person 1 or 2)

Gate 3: Revenue Change

- ****Trigger:**** Any revenue share adjustment
- ****Action:**** Human signature required
- ****Timeout:**** 7 days → hold payment
- ****Who:**** Both partners

Escalation SMS Triggers

\\

"refund", "chargeback", "lawsuit", "lawyer", "legal",
"custom deal", "enterprise", "exclusive", "agency of record",
"phone call", "meeting", "zoom", "contract negotiation",
"platform ban", "account suspended", "hacked",
"death threat", "dox", "harassment"

\\

****Human workload:**** 3-5 escalations/day, 30 minutes total.

9. THE 30-DAY SPRINT TO \$5K-10K

Week 1: Deploy + First Clients

Day 1-2:

- Deploy ClipForge VPS (docker-compose up)
- Install Hermes relay server
- Flash 10 phones with Hermes Bridge APK
- Test: one phone → open TikTok → DM test account

Day 3-5:

- Person 1: Outreach to 50 streamers/day via Twitter/Discord
- Person 2: Download 5 VODs, produce 15 sample clips
- Message template: "I made 3 clips from your last stream. Here's one. \$500/mo for daily clips."

Day 6-7:

- Close first 2-3 clients at \$500/mo
- Collect payment via Stripe upfront
- Start daily production for paid clients

Week 2: Scale Outreach + Systematize

Day 8-10:

- Add 10 more phones (20 total)
- Build Notion/Airtable tracker
- Create caption templates, thumbnail layouts, hashtag sets per game
- Person 1: 50 messages/day → target 100 total leads

Day 11-14:

- Close to 5-8 total clients
- First clips go live on client accounts
- Monitor analytics, screenshot wins for social proof

Week 3: Optimize + Expand

Day 15-18:

- Analytics Optimizer agent learns winning patterns
- Double down on best-performing game/category
- Add local business vertical (Google Maps sourcing)
- Close 2-3 restaurant/HVAC clients

Day 19-21:

- First viral clip hits 100K+ views
- Screenshot analytics → case study
- Use case study to close 2 more clients at \$1,000/mo

Week 4: Hit Target

- **Day 22-25:****
- Total clients: 8-12
 - Revenue: \$5,000-\$10,000 committed
 - Automate onboarding: Stripe link → auto-add to production queue

- **Day 26-30:****
- Collect payments
 - Re-invest in 20 more phones (48 total)
 - Document SOPs for scaling to 50 clients

10. RISK & MITIGATION

Risk	Mitigation
****Platform bans****	Hermes uses native apps (not APIs). Rotate accounts. Residential proxies.
****DM spam reports****	Max 5 DMs/account/day. DeepSeek personalizes every message. Auto-unsubscribe on "no".
****Stripe chargebacks****	Clear refund policy. Auto-refund first 48h. HITL on disputes >\$500.
****Legal (TCPA, CAN-SPAM)****	These are in-app DMs, not SMS/email. Gray area. Keep opt-out.
****DeepSeek API limits****	SiliconFlow backup. Cache prompts. Ollama pre-screening.
****Hermes detection****	Accessibility Services is legitimate Android feature. No root. No jailbreak.
****Client churn****	Monthly analytics reports show ROI. Viral bonuses incentivize retention.

11. COMPETITIVE MOAT

Competitor	What They Do	Why ClipForge Beats Them

| ****Opus Clip**** | Auto-edit videos | No client acquisition. No posting. No revenue share.
|
****Munch****	AI clip detection	API-only. No physical farm. No regional FYP data.
****Human editors (Fiverr)****	Manual editing	\$20-50/clip, 24-48h turnaround. We do 50 clips/day at \$0.20 marginal cost.
****Other agencies****	Full-service	No AI automation. High headcount. We scale with code, not people.
****In-house teams****	Dedicated editor	\$3,000-5,000/mo salary. We cost \$500/mo with better output.

****The real moat:**** 48 physical phones seeing 48 different algorithmic realities. APIs give you sanitized data. We see the raw FYP.

12. SCALING ROADMAP

Month 1: Proof of Concept

- 10-20 clients, \$5k-10k revenue
- 10-20 phones, manual oversight
- Validate: gaming clips + local business

Month 2-3: Automation

- 48 phones online
- Hermes multi-device (v0.4)
- 80% of pipeline autonomous
- 50 clients, \$25k/mo

Month 4-6: Multi-Vertical

- Podcast, HVAC, restaurant, influencer seeding
- Trend intelligence SaaS
- 100 clients, \$50k/mo

Month 7-12: Platform

- White-label to other agencies
- API for third-party developers
- On-device LLM (Hermes v0.6)
- 500 clients, \$200k+/mo

13. THE BOTTOM LINE

****Two people. One VPS. One rack. 48 phones. \$220/mo in AI costs.****

The infrastructure is built. The AI is cheap. The market is starving. The only question is whether you deploy tonight.

****Deploy. Close. Collect. Scale.****

Built with Paperclip AI, DeepSeek V4, Claude Opus 4.8, Hermes Android, and FFmpeg.
July 2026.
